Allowable Subject Matter

Claims 30-47 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to development of the warning system to prevent possible encounter of aircraft with danger areas of wake vortices generated by an object, which is named as the 'vortex generator' and situated in the aircraft vicinity. Each independent claim identifies the uniquely distinct features: The methods for preventing an aircraft from penetrating into a dangerous trailing vortex area of a vortex generator as claimed in the independent claims 30 and 37 in its entirety. The cited prior art fail to anticipate or render the limitations of independent claims 30 and 37 obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Kuntman et al. (US 6,703,945), Ooga (US 6,424,408) and Cabot et al. (US 6,177,888) are cited to show a variety of vortex turbulence warning systems.
